The appointments and service are equal to any hotel on the coast.

Rates: \$1 to \$3.50 per day.

G. A. Sweet, Manager.

Mayor Pattullo Explains Situation

(Continued from Page 1.)

mitted a bylaw to the people, and if that bylaw had passed should have raised the money on the security of a debenture issue before starting the work at all.

"When the 1910 Council went out of office it left a surplus on current revenue and sufficient money on capital account to complete Section One improvements as then contemplated. Since that time further work in Section One, not originally contemplated, increased the capital expenditure, in addition to which the Section One fund was so 'milked' (illegally) for other purposes that the fund naturally went short.

"This is the kind of thing to which we are determined to put a stop this year, and not only must we pay all current expenses for the year out of our current revenue, but we will have to provide for a large deficit from last year. This, as may be assured, we will do, but in addition to this we want to make provision (legally) for such capital expenditure as will not only enable us to start work ourselves but will place the Council of next year in a position to continue the work until such time as that Council can, in a similar manner, make further provision for capital expenditure.

"Now, what I have said is not said in a spirit of reflection upon anybody, but merely that the public may thoroughly understand the financial situation, and the absolute necessity of putting our finances upon a sound, business basis."

NEW CALENDAR MAY BE AUTHORIZED BY POPE

(Continued from Page 1.)

Gabriele Nahapetian, a learned priest of Venice. His idea is to divide the year into 360 days, which then would be subdivided into the usual twelve months of thirty days each. Four of the five days that would thus be left over in the ordinary solar year, he would dispose of by adding one of them to the last month of each quarter, namely March, June, September and December. Then, finally, the fifth extra day he would dispose of by not tacking it on to any week or month, but by merely making it an extra day that would come in between the last day of the old year and the first of the new.

Under this calendar Father Nahapetian points out that New Year's Day, which in the church is known as the Feast of the Circumcision, would always come on Sunday, as would of course Christmas. The first day of each quarter would also be always a Sunday, and April 1st would be permanently fixed as Palm Sunday. Easter would also be always a Sunday except in leap year, when he proposes to dispose of the extra day of the year by inserting it between April 7th and April 8th and making it Easter instead of the usual Sunday of April 8th.

Some other advantages which it is declared this calendar would bring would be the permanency of the days of the different months. For instance, the first day of the first month of every quarter would always be Sunday; the second day of the second month of each quarter would always be Monday, while the third day of the third month of each quarter would always be Tuesday. Thus, while it would require a mathematician to figure out under the present calendar on what day would fall January 3, 1945, a child would know, under the proposed calendar, that it would be a Tuesday.

Such a calendar, it is believed, would have great advantage in the commercial, industrial and laboring world in doing away with all mistakes arising from the irregularity of the months and of leap year and in reducing all calculations of weeks, months and years to the simplest possible basis.

LOCAL NEWS ITEMS

Captain P. Rorvik, manager of the Standard Fisheries, left for the south this morning on the Prince Rupert.

John Piercy, of Piercy, Morris & Co., returned to his home in Victoria this morning after a visit of a couple of weeks in this city.

Mrs. Roberson, wife of Captain Roberson of the G.T.P., was amongst the southbound passengers this morning on the Prince Rupert on a visit to Vancouver and Victoria.

Hugh Tooker, of the staff of Ritchie & Agnew, civil engineers and surveyors, left on a short vacation to the south this morning.

M. Albert, of the Westholme Lumber Co., was amongst the passengers going south this morning on the Prince Rupert. He is on a business visit to the company's headquarters at Victoria.

George J. Frizzell left this morning for a short vacation in the gay cities to the south of us. Mr. Frizzell was all smiles at the prospect of his well earned little jaunt.

W. J. Alder, a former resident of this city, who has been paying Prince Rupert a visit for the last ten days, returned to Victoria this morning to rejoin his family. Mr. Alder, who has travelled extensively in both Canada and the United States, says that for a place of residence, not to mention the unparalleled opportunities offered for making money, Northern British Columbia, and Prince Rupert particularly, is the best place he has struck yet.

Among the arrivals on last night's train was Mrs. D. J. McPhee of Telkwa, who was at once taken to the hospital suffering from a serious illness. Although the trip from Telkwa to Prince Rupert was a strenuous one, Mrs. McPhee stood it remarkably well. The sixty mile drive from Telkwa to Hazelton with the thermometer below zero was particularly trying.

F. R. Jessop, engineer with the G. T. P. construction, reached the city on last evening's train, a year having elapsed since he was last in Prince Rupert. Mr. Jessop, who will leave on an extended visit to the lower coast cities in the course of a week or so, is very much struck with the vast progress the city has made since his last visit here. He will make a run over to Masset to visit his brothers, who are residents of the Graham Island capital, before leaving for the south.

The Rev. E. C. and Mrs. Burch who are on their way to Los Angeles, California, for a two months' visit, left this morning on the Prince Rupert. The Rev. Mr. Burch, who is rector of St. Andrew's Episcopal Church, has been forced to take a vacation on account of ill health. It is sincerely hoped by the numerous friends he has made during his short sojourn in this city that the change will completely restore him. During his absence the duties of the parish will be carried on by Bishop Du Vernet, assisted by the Rev. W. E. Collison.

Mr. F. S. Long, formerly manager of the local branch of the Bank of British North America, left this morning for Calgary to assume the management of the branch of that institution there. A large number of Mr. Long's friends were on the wharf this morning to wish him goodbye and good luck. During a residence of a little over two years in Prince Rupert, as manager of the Bank of B. N. A., Mr. Long has made a large number of warm personal friends. Previous to coming here he was for a number of years on the staff of the bank in Dawson City, going there first in the palmy days of 1900, when the golden city was at the zenith of its wild and exciting career. In common with all who were there in those halcyon days, Mr. Long enjoyed the bizarre and unconventional life, and looks back upon them as amongst the happiest and most interesting of his career. For some time he was acting manager of this important branch, and not the least of the regrets at his departure from Prince Rupert are those expressed by his many old Klondyke friends now resident in this city.

BASEBALL LEAGUE MEETING LAST NIGHT IN CITY HALL

At the meeting of the executive of the Indoor Baseball League, held last evening in the city hall, the following teams were represented and made application to enter the league: Brotherhood, Men's Own, Tigers and Pirates. The first of the schedule of games will be played at the skating rink on Sixth avenue on Thursday next, February 13th, the opposing teams being the Brotherhood and Pirates. After concluding this business the meeting adjourned and assembled again immediately for the purpose of organizing an association to be known as the Prince Rupert Amateur Athletic Association. It was decided to make application for affiliation with the B. C. Association, which would mean in turn affiliation with the Dominion Amateur Athletic Association. Application has also been made to the G. T. P. for a lease of a park site back of Block 41, Section 5, near Hays Creek. The following officers were elected as heads of the new organization: F. Landes, president; W. D. Vance, secretary; H. J. W. Brooks, treasurer.

E. G. Baxter, Provincial government engineer, with headquarters in this city, left for Victoria this morning on business connected with his department.

H. L. Bodwell, G. T. P. resident engineer, left this morning on the Prince Rupert for Vancouver on business connected with the company.

Better than Ringing Door-bells

A PIANO manufacturer recently made a house-to-house canvass. He's one of those men with an absurd fear of the "waste-circulation" bugaboo—cannot get away from the haunting thought that only 10 out of every 100 readers of a newspaper may be possible buyers of his goods.

So he refused to advertise, and went a-canvassing—inviting people to come to his piano recitals. Then he wondered why they didn't come.

This is why:

He wasn't reaching the people.

His canvassers rang every door-bell in town. They talked to some one in every house.

But one in every household isn't enough—particularly if it doesn't happen to be the right person. And, as a rule, it wasn't the right person—it was a servant, or a child. The woman of the house was seldom seen; the man of the house, never.

Now, if the piano maker had placed an ad. in the newspaper, it would have reached thousands, where the canvassers could reach only hundreds.

And even though only 10 per cent. of the readers are actual piano buyers, this does not mean that the advertising read by the other 90 per cent. is wasted. Advertising talks, not only to the prospective buyer,

but also to his wife, his grown-up sons and daughters, his mother—even his mother-in-law. Their coaxing will help to convince the head of the house—and pretty soon there'll be a piano in that home.

This and dozens of similar cases which might be cited to show that "waste circulation" is an empty bugaboo, and should deter no one.

Take the motor truck. It can be sold only to large firms. Yet a motor truck manufacturer is successfully advertising in daily papers. He realizes that he must reach, not alone the managers of the concerns that require trucks, but also their directors, their foremen, their head machinists, etc. It is found in actual practice that this Advertising radiates in a thousand directions, and again converges most astonishingly to influence the house that has made up its mind that horse-trucking is too costly and inefficient.

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lumsden Bldg., Toronto. Enquiry involves no obligation on your part—so write if interested.
