

LUCKY MCARTY AND HIS NEWEST STUNT

Amazons Broadway by Appearing in His Bathrobe and Fighting Togs.

New York, May 1.—Luther McCarty, who outfought Frank Moran in a bout at the St. Nicholas

Club last night, attempted to set a new fashion for street clothes at a prominent Broadway hotel by appearing in his long bathrobe and fighting togs. The management was surprised when McCarty appeared in the lobbies thus arrayed on his way to the club, and when he returned at midnight in the same fashion he and his chief handler, Joe Jeannette, were requested to give up their

suite and leave the hotel. They did so.

Armed Merchant Steamer

London, April 29.—The first British merchant steamer to carry guns and ammunition in time of peace leaves Southampton for South America tomorrow. The vessel in question is the Royal Mail Steam Packet Com-

pany's Argonaut, 10,000 tons and she has among her crew sufficient officers and men of the Royal Naval Reserve to work her armament should such action be needed.

J. G. Weston left this morning for Vancouver to purchase some more horses for his transfer and cartage business.

YUKON GOLD DUST NOW GOING TO VANCOUVER

Elimination of Exchange Charge at Assay Office Has Diverted It from Seattle

Ottawa, April 30.—That the immediate result of eliminating the exchange charge on gold at the assay office in Vancouver had been the diversion of the stream from the Yukon to Ottawa mint instead of the San Francisco mint, was asserted in the House of Commons last evening by Dr. Thompson, of the Yukon. In 1912, only one fourth of the five million dollars produced in the Yukon had reached Ottawa, and the welcome change fully justified the establishment of a Canadian mint.

The debate was occasioned by the request of the Hon. W. T. White for an increase in the vote for the mint from \$75,000 to \$110,000.

Mr. McLean, of South York, suggested a subsidiary coinage of the metals peculiar to Canada, cobalt and nickel.

Sir Wilfrid Laurier said it would be better to establish nickel and cobalt industries in Canada.

Graham Island Coal.

The report of Dr. Clapp on the coal prospects of Graham Island promises to be of an optimistic character. A preliminary outline of his report says: "It was found that the cretaceous coals, while of excellent quality, occur in much smaller basins than was previously thought, and that the basins are deformed and involved with later igneous rocks, which occur chiefly as dykes and sills or laccoliths, and possibly as flows. However, considering the excellent quality of the coal, many of the basins are well worth further prospecting." — Mining and Engineering Record.
