# Ine New Gurney-Oxford Range Has Solved The "Help Problem"

Everywhere women are coping with the same difficulty - the securing of domestic help.

A Gurney-Oxford with its wonderful devices for the saving of time and labor enables you to be independent, if from necessity or choice you are without a servant.

The Divided Flue distributes the heat evenly throughout the oven, and by means of the Economizer the temperature is determined, kept constant, or changed as desired. It is easily controlled by a little lever working around six notches.

Dough and batter-mixtures will always be light, thoroughly cooked, and nicely browned.

This stove saves you the dreaded black leading process for it has an unchanging polished top.

If you must do your own work you owe it to yourself and to your family to spend less time in the kitchen.

No woman need be a drudge with a Gurney-Oxford range.

## Rivers Rising Rapidly.

The Skeena and Bulkley Rivers are now at high water mark and there is still a great amount of snow to come off the mountains. All the creeks feeding these two streams are like full sized rivers and the Skeena and Bulkley are rising rapidly and give promise of establishing a new high water mark. In that case the fills and cribbing on the railway grade along these rivers will be severetested .- Omineca Herald.
