

RECENT PICTURES OF THE PRETTY DUCHESS OF CUMBERLAND.

The Kaiser's daughter and her hubby, the cousin of George V of England, have settled down seriously to the high position of Grand Duchess and Grand Duke, which means the rulers of a wide territory assigned to them by the Kaiser as a wedding gift.

CONSERVATIVE CROP REPORT
FROM BUREAU OF STATISTICS

NEARLY TEN MILLION ACRES IN WHEAT AND NEARLY AS LARGE AN ACREAGE IN OATS—CROP CONDITIONS FAVORABLE.

Ottawa, June 23.—A bulletin of the census and statistics of agriculture recently gives preliminary estimates of the areas sown to the principal grain crops and reports on their condition at the end of May, according to the returns received from crop-reporting correspondents throughout Canada. The report shows that the month of May proved cold and dry, with frequent night frosts, and that these conditions, while favorable to seeding, retarded the growth of the crops sown and caused them to be unseasonably backward.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912, the area in spring wheat being 8,990,500 acres, or 13,100 acres more. Oats occupy 9,608,500 acres, as compared with 9,216,900 acres in 1912, an increase of 391,600 acres. Barley occupies 1,425,200 acres, an increase of 10,000 acres, and rye 126,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 459,500 acres. The estimated acreage under hay and clover is 7,475,600 acres, compared with 7,633,600 acres last year.

For the three northwest provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,800 acres, as compared with 8,961,800 acres; that of oats at 5,207,700 acres, compared with 4,913,900 acres, and that of barley at 852,600 acres, compared with 809,800 acres, these differences representing increases of 52,000 acres for wheat, 293,800 acres for oats and 42,800 acres for barley, or 388,600 acres for the three crops.

On May 31 the condition of the crops was reported as generally favorable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the condition on May 31 for the Dominion was as follows: Fall wheat, 80.62; spring wheat, 91.55; oats, 91.72; barley, 94.19; rye, 87.70; peas, 88.24; mixed grains, 90.15; hay and clover, 81.12; pastures, 85.08, and alfalfa, 77. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye, 87.24, peas 83.85 and mixed grains 87.32. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.

DROPS DEAD AT HIS DESK

Mr. Walter Sparrow Victim of Apoplexy.

Vancouver, June 23.—Stricken by apoplexy, Mr. Walter Sparrow, a well known resident of this city, yesterday dropped dead in Mr. Simon Leiser's office. The deceased, who was about 57 years old, had been in poor health for some time. He was a native of Colborne, Ont., and came here in 1862 with his father, who for many years was bookkeeper for Pendray & Sons, passing away a number of years ago. He received his education in Victoria, and when a young man left here for Oregon, where he resided for some time, returning here twenty-five years ago and taking a position as bookkeeper with Simon Leiser & Co., which he held until his death.

Guggenheim's Genl.

The Yukon Gold's Twelvemile hydro-electric power plant has started, and is driving the company's eight dredges. The company's big water ditch is carrying 5,500 inches of water, and many hydraulic giants are running. The company's work is booming, with 600 to 700 men on hydraulic and dredge work.—Dawson News.

Prince Rupert's Artistic Job Printing Establishment

Jogging Laziness
into Activity

The merchant whose business lags in the summer has himself to thank.

To slacken the selling pace in the hot season—to lessen Advertising activity—indicates a resignation which has no place in modern business.

If we think we cannot keep our business booming in summer time, we surely will not.

What a jolt it must have been to the fur trade, when the first mid-summer fur advertisement was run in a daily paper! Now many fur stores are following the example of that progressive fur man who dared to believe that fur sales need not go down as the mercury goes up.

Energy, linked with Advertising, has turned the month of January into the biggest selling season for white goods. Advertisements of a high stimulative power, combined with a disregard of "seasons," have opened up automobile selling two months earlier than was once thought possible. Advertising has started Christmas shopping early in October instead of the middle of December.

Advertising rises superior to seasons and thermometers. The right kind of Advertising strikes a responsive cord in human nature—and human nature is the same in August as in December.

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lansden Building, Toronto. Enquiry involves no obligation on your part—so write, if interested.
