COAL DEALER WAS ADVISED TO INCREASE HIS CHARGES

THE OTHER DEALERS SUGGESTED THAT HIS PRICES WERE TOO LOW—EVIDENCE AT LAST SESSION OF COAL COMMISSION.

With some reluctance Mr. Frank Kelly, president of the Don Transfer and Storage Company, admitted to Coal Commissioner Burns yesterday afternoon that he had been approached by coal merchants with the suggestion that it might be more profitable to him if he raised the price of his coal. He said that he had replied, however, that he was quite satisfied with the return from his present charge of 50 per cent. Buying by the ton and selling by the short ton making allowance for the cost of freightage, cartage, storage and occasional screening, he was able to make a profit of about 50 cents a ton, with which he was content.

Mr. Kelly said that he had not the same trouble as to loss of sacks which had been experienced by Rogers & Black. He always instructed his teamsters to bring the coal back rather than to leave it in the sacks. It was better to lose \$1.50 the teaming than \$2 for sacks. Mr. Kelly thought a teamster could hardly make wages at less than \$1.75 a trip. There were many things here to make teaming expensive. For instance, if horse went lame it could not be turned out to pasture as in other places, but had to be fed a stable.

In a short session held later in the afternoon, about 4 o'clock, Mr. Burns interrogated two city officials, Manager T. C. Duncan of the electric light department and A. Brooksbank, the city pur-

chasing agent. It appeared from Mr. Brooksbank's evidence that the city had been formerly asked \$9 a ton by the dealers and \$9.55 since only imported coal could be procured. As the city had deemed this too high, and as it was a large purchaser, it purchased direct from the mines, getting its coal thereby 75 cents a ton cheaper, and getting a long ton instead of a short, so making a further gain equivalent to one-eighth of the price. A cheaper quality of coal, the Newcastle coal, had been tried for a while at the lighting plant, but had been found unsatisfactory.

With the investigation of these men the sitting of the coal commissioner in Prince Rupert came to an end. Mr. Burns and his secretary, Mr. Clegg, went south this morning. Mr. Burns will conduct his next investigation at New Westminster. He will submit a report of his inquiries with his findings to the Provincial government in the autumn.

LEASE OF MORE WATERFRONT MAY BE PLACED ON MARKET

BOARD OF TRADE HAS REQUESTED PREMIER MCBRIDE TO PUT LEASE OF TWO BLOCKS TO AUCTION ON FAIR TERMS.

Since the evidence given by the local coal merchants yesterday and on Wednesday went to show that the present wharfage was far from sufficient and that this was probably one cause of the high price of coal, the citizens of Prince Rupert will be pleased to learn that the Board of Trade has been making efforts in a direction which should alleviate the situation. It has requested the Provincial government to put on the market the lease of its waterfront properties, known as Blocks D and H. As these are located one at the harbor entrance and the other near the cold storage plant, wharves erected on them might not be of direct use to the coal merchants, but they should relieve the congestion at the other wharves by taking away the fishing boats and some of the freight.

The resolution of the Board of Trade on this matter was sent in the form of a petition to the Provincial premier, Sir Richard McBride, requesting that a twenty year lease of Block D and H be placed on the market for public auction, and that they should be at such reasonable rentals as ordinary industrial enterprises can afford to pay. The lease is to be subject to the condition that it will be cancelled unless improvements to the value of \$3,000 be placed on each lot of one hundred feet frontage within six months of the lease.

A letter from the Premier's office was received a few days ago by the committee appointed by the Board of Trade to deal with the matter. In this letter it was stated that the Premier would take up the recommendation with the minister of lands.
