FOR THE OUT-OF-WORK AND HUNGRY

The little side door, a new and admirable church activity in most Canadian cities at present time

Newest Notes on Science

Small wedges of appropriate shape have been invented for straightening crooked toes.

Germany now leads the world in the use of machinery directly driven by electric motors.

Less quicksilver was produced in the United States last year than in any year since 1860.

Southern Italy will have a \$13,000,000 hydro-electric plant generating 150,000 horse power.

More than one-half of the fuller's earth produced in the United States comes from Florida.

Of German invention is a series of moulds to enable children to make building blocks out of snow.

Arizona last year made new high records for the production of gold, silver, copper, lead and zinc.

Two more European capitals, Vienna and Bucharest, have been connected by a direct telephone line.

A new electric churn for household use is operated by a motor of only one-thirtieth of a horse power.

The largest hens' eggs are produced in Manchuria, those weighing one-sixth of a pound being common.

A Pennsylvania inventor's rat trap can be set with the foot, eliminating the danger of broken fingers.

The Moscow museum of agriculture, the oldest in Europe, will celebrate its fiftieth anniversary next year.

For women's wear an adjustable hat lining has been invented, said to conform to any shaped headgear or head.

The first steamer designed exclusively for laying submarine cables ever built in France recently was launched near Havre.

Utah, which had a record production of copper in 1912, exceeded that year's figures and made a still higher record last year.

The first English plant devoted exclusively to making steel by electrical processes is being erected by a Sheffield company.

A recent patent covers a sickle with the blade adjustable to

three positions or removable altogether to be replaced by a saw blade.

The height of buildings in Hungarian cities is limited by law to 82½ feet.

Pennsylvania again broke all records for coal production last year with an output estimated at 267,000,000 short tons.

Apparatus invented by a Frenchman compresses air in a reservoir as the doors of a house are opened and utilizes it to wind clocks.

RUSE TO CAPTURE OUTLAW IS FAILURE

Beardsley Holds Rifle While the Pretended Photographers Take His Picture

Mayville, N. Y., Jan. 24.—Sheriff Anderson failed today in two attempts to break the seven-day siege of the Beardsley farm at Summerdale and to arrest Edward Beardsley. In the first he used two out-of-town detectives, posing as photographers, to get close to Beardsley to grapple with him. Beardsley posed for a picture at the window, but never relinquished his rifle, and the detectives could not carry out their plan.

Late this afternoon Fred Beardsley, a cousin of the besieged farmer, Axel Olsen, a friend, and Luther S. Lukin, county clerk, visited the outlaw. The sheriff thought Beardsley might surrender to Mr. Lind. Beardsley received them at the window and talked freely, but stuck to his determination not to surrender.

ARREST TEN FOR WAR ON TEACHER

Officers Accuse Men and Women of Boarding Up School and Ordering Instructor Out

Tacoma, Jan. 20.—Opposition to D. M. Wolfe, school teacher in district No. 123, at Gertrude, on McNeil Island, resulted today in the arrest of ten men and women who boarded up the school after giving the teacher one hour in which to get out. The ten appeared before Justice Joe Larkin at Long Beach today and were released under \$200 bonds each to appear for trial this week. One of those arrested was Martin Ellison, clerk of the Board of school directors. The other two directors are said to be defending Wolfe.

FRAIL WOMAN CARRIES HUSBAND FROM FLAMES

Wife, Weight 120 Pounds, Drags Out Man, 200, Who Was Overcome by Smoke

Tacoma, Jan. 19.—In stumbling over the unconscious form of Capt. John T. Nolan, a contractor, and his wife tonight, just inside the door of their burning home, firemen found evidence of the strength of a little woman in an emergency.

Nolan, who weighs 200 pounds, was asleep on a couch when the flames broke out and was quickly overcome by smoke. His wife, middle-aged, frail and weighing about 120 pounds, was upstairs. Smelling the smoke she picked him up in her arms and half carried, half dragged him thirty feet to the doorway, when she, too, was overcome and then fell in a heap. Nolan died tonight and Mrs. Nolan is not expected to recover.

GOSSIP SENDS BRIDE AND GROOM TO GRAVE

Man and Wife Who Was His Niece Drink Poison When Censured

Cortland, Ill., Jan. 24.—This village is silent and grief stricken preparing to follow in a body the funeral of John Aldis and his 16-year old niece, who killed themselves as a result of the denunciation that followed their marriage. The couple were threatened with being tarred and feathered. The indignant villagers refused to speak to the girl and the public prosecutor warned them that they must either have the marriage annulled or leave the state.

Sunday night they declined to give up the fight. Later they were found dead from poison. Clergymen yesterday excommunicated the villagers for their stand. A meeting was held, money was subscribed for flowers and all Cortland will follow the funeral to the graveyard.

"I have taken a job," said the plain young woman, "as a school teacher."

At this her chum cried: "What! Teach school! Why, I'd rather marry a soft, fat, bald-headed bachelor with eight children than teach school."

The plain young woman sighed. "Ah, she said, 'so would I.'"

"Henry, it says here that Mr. Jackson pelted the pill for three sacks. What does it mean?"

"Good heavens, Mary, can't you understand plain English? It means that he slugged the sphere safe and landed on the third pillow."

Noblesse Oblige

Rank imposes obligations—
or—as the French put it—"Noblesse Oblige."

It is a very natural and right principle that those who by their position in life command the respect of others should deserve it and be worthy of maintaining their position. "Much is expected of those in high station."

But this principle is not confined to persons of noble birth—it has a hundred applications. It applies, for example, to those manufacturers of reputation and prestige who make goods of high quality and who advertise them constantly in the newspapers of the land.

By their advertising they have attained an eminence where the very best in quality and good service is expected of

them. They have set a standard and their very business life depends on the constant maintenance of it.

So that when you buy advertised articles you rest assured that you are getting the best value that money can buy.

Well may you place your faith in advertised goods. Well may you give them preference over articles which you can only hope may prove satisfactory.

For the principle of "Noblesse Oblige" is your guarantee of excellence in Advertised Goods.

If you are doing a local business talk over your advertising problems with the Advertising Department of this newspaper. If you are doing a provincial or national business it would be well for you to have the counsel and assistance of a good advertising agency. A list of these will be furnished, without cost or obligation, by the Secretary of Canadian Press Association, Room 503, Lumsden Building, Toronto.

PRINTING

Summer is over and the Fall trade has begun. To get your share you must have some sort of printed matter—a circular, folder, booklet or catalogue. Be sure to have that work done properly. You would not send out a shabby salesman to represent you; then don't make the mistake of sending out a poorly printed circular or booklet. We are QUALITY PRINTERS and can produce a piece of printed matter that you would be proud of and which will get results. Try us. Phone 98.
