MILLIONAIRE FACES WHITE SLAVE CHARGE

Bond Fixed at \$10,000—Declares It Blackmail Game

San Francisco, March 2.—J. Parker Whitney, the millionaire clubman accused in a warrant issued yesterday of violation of the Mann White Slave Act, was arrested early today on his ranch in placer county. His bond already had been tentatively fixed at \$10,000 and he was allowed to remain in charge of the arresting officer on the ranch for the remainder of the night.

Whitney took his arrest calmly. He asked for particulars and when told that he was charged with having transported Genevieve Hannan from New York to San Francisco for immoral purposes, he said:

"I have been expecting this trouble for some time and I am glad things have come to a climax. It is simply a case of blackmail."

Shipped Boy as Hog

Lincoln, Neb., March 4.—A boy created and shipped as live stock was the discovery made by a veterinary here when he was called upon to inspect a load of goods billed from Bertrand, Neb., to Burke, South Dakota. The way-bill of the shipment included household goods and "one hog valued at \$10." Being an interstate shipment inspection was required. The veterinary found the household goods but no sign of a hog. A careful search, however, revealed a boy curled up in a corner of the car, none the worse for his trip. By billing the car as part live stock the shipper is allowed the low rate on the household goods, and in the absence of a hog the boy was sent by the shipper as a substitute.

Dayton—I know the tango and the turkey trot, but what's the St. Vitus?

Doyle—It's the one you do with a trained nurse.

Port Edward has a perfect natural harbor. 471f

GOLD SEEKERS ON THE TRAIL AGAIN

Miners Are Leaving for the Omineca and Ingenica Gold Fields for Another Season

(Omineca Herald.)

The past week or two have witnessed a big decrease in the population of the district, most of the boys leaving the old town where they have been wintering. The winter was breaking up and the snow was going fast. All the Ingenica and Omineca prospectors and miners got busy immediately hit the trail for the old gold fields of those famous districts. It is customary for the boys to leave here just as the snow is beginning to go so they can cross the summits and get over the creeks before the final break-up and spring freshets.

Last week the following left the old town for the interior: Jensen, Olson, Glendenning, C. Munro, Aitkins, Arthur and Billy Leveret, Hawk and Kohse. The Royal Standard Investment Co. and Otterson's parties are expected to arrive from the south at any time to hit the trail for their gold dreams. This year will be the biggest since the rush some forty odd years ago, and it is predicted on all sides that more gold will come out of those districts than since the early days.

Board of Trade Luncheon

Members of the board of trade who intend being present at the board's first luncheon, to be held in the G. T. P. cafe on Friday, are requested by the committee in charge—Alex. Manson and A. H. Allison—to secure their tickets as early as possible, so that the caterer may know how many to provide for. Tickets may be obtained at the commissioner's office, 341 Second Avenue. The regular monthly meeting of the board takes place the same evening, commencing at 8 o'clock.

Many lines of goods to be sold at half price in the next 15 days at Wark's. 491f

MILWAUKEE WILL TRY OUT ELECTRICITY

Engines in Rocky Mountain District in Montana Are to Be Changed

Butte, Mont., March 3.—Definite word has been received in Butte that construction work on the electrification of one engine district of the Milwaukee road between Three Forks and Deer Lodge will be started in a few weeks.

This is a part of the project to electrify the Milwaukee road between Harlowtown, Mont., and Avery, Idaho, 440 miles across the Belt, Rocky and Bitter Root mountains, a total distance of four engine districts, with maximum grades of 2 per cent.

Probably no railroad electrification scheme has aroused such interest in the engineering world as this stupendous task which the Milwaukee has placed before it. It has been decided to adopt the 2,400 volt direct current system of propulsion, utilizing the regenerative electric braking feature, which will take the place of the air brakes on the mountain grades.

WESTERN STATES WILL HAVE 'SALMON DAY'

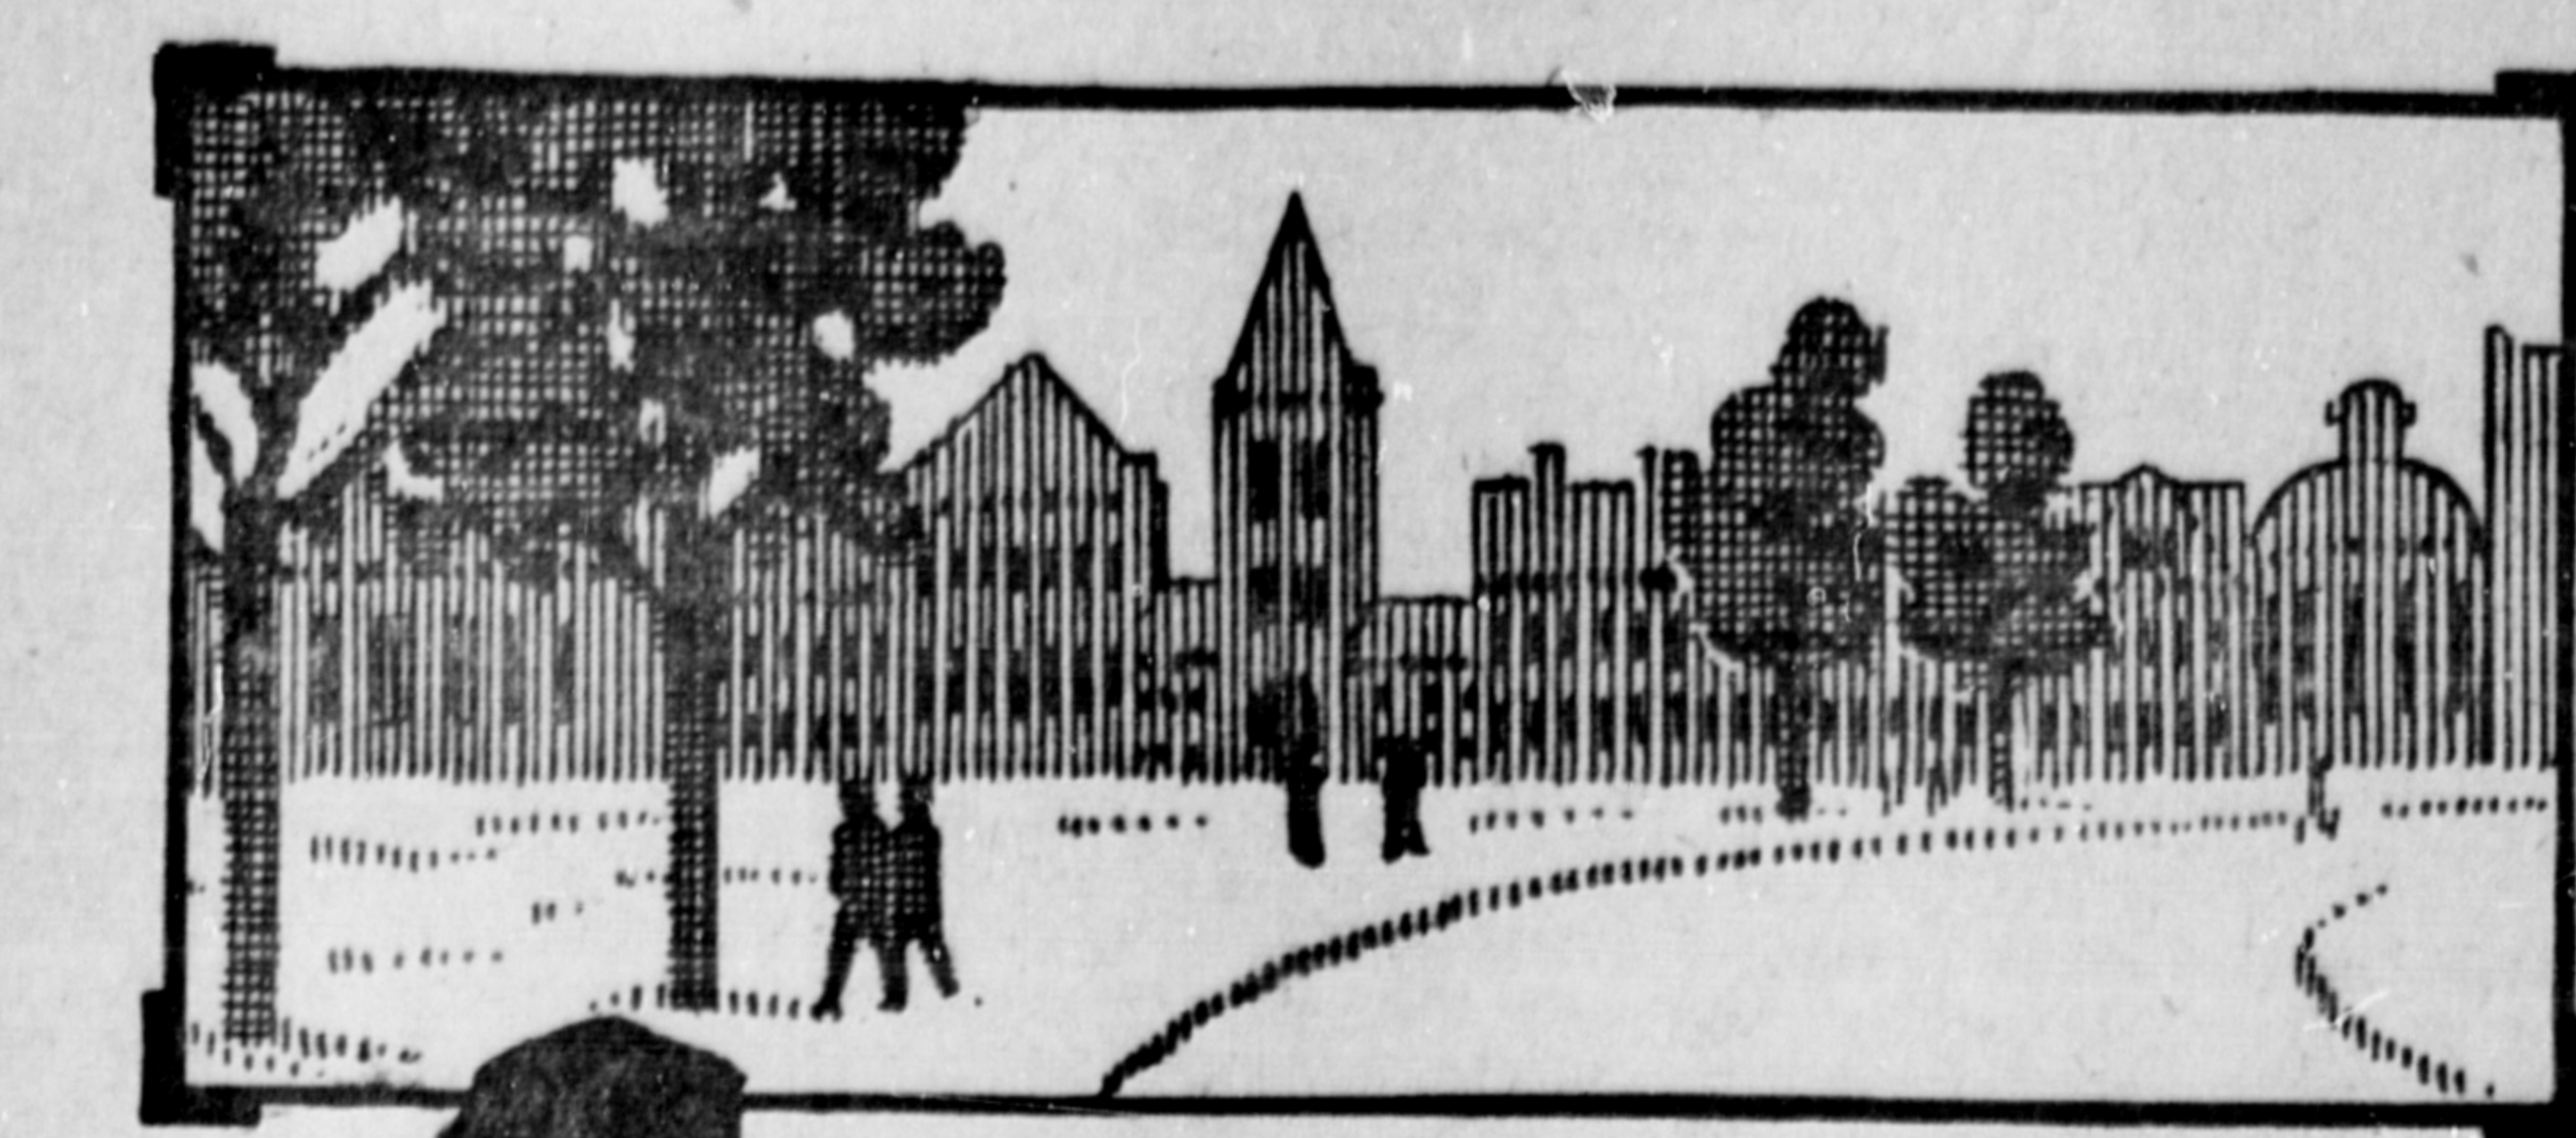

Culinary Possibilities of King of Fish to Be Exploited in Northwest

"Salmon Day" is the latest institution in the celebration line to be introduced in the northwest. All the culinary possibilities of the "king of fish," as the salmon is sometimes termed, are to be exploited on March 13th throughout the American northwest, and as far inland as the influence of the owners and the railways will reach. The innovation will be patterned on the order of "Apple Day," which was celebrated last autumn throughout the United States.

Assistant General Passenger Agent A. D. Charlton of the N. Pacific railway at Tacoma, has notified agents in his territory of the "salmon day" idea, and asked them to try and secure the co-operation of commercial organizations and hotels in the various towns with a view to emphasizing the culinary possibilities of the salmon.

King Salmon (or spring salmon as it is known in Canada) will figure prominently on the Northern Pacific dining cars on March 13, and the chefs are expected to evolve some new and wonderful dishes from the fish in honor of the occasion.

Miss L. M. Custer extends a cordial invitation to the ladies of Prince Rupert to attend her millinery display on March 6th and 7th. 51-52

The Poor Man's University

"JONES knows more about motor cars than any other man I know," said a man to his friend. "He has obtained his knowledge chiefly from motor car advertisements, and the catalogues and booklets circulated through them."

"All I know about photography," declared a well-known amateur, "I have learned from the men who advertise cameras, plates, papers and films."

Advertisements have been well called "The Poor Man's University," but other than poor men have been schooled thereby.

Much of what the average individual knows concerning personal and domestic hygiene, modern office methods, books and authors, electricity, precious stones, investments, and almost everything else, he has learned from advertisements.

Advertisements have stimulated our intelligence, added enormously to our knowledge, and given us aspirations which have raised us to higher levels of thinking and living. Advertising is indeed "The Poor Man's University."

A NEWSPAPER

for Prince Rupert and Northern B.C.

The Daily News goes into nearly every home in Prince Rupert. It is the popular newspaper of the city because it is clean and reliable. It has all the news of the city, and keeps in touch with events and topics interesting to Northern British Columbia. It treats these subjects with moderate optimism and reliability.

The Daily News is the most valuable paper to advertisers because it is read by the buying public. It has a bigger circulation than any other paper in the city. It is read by the class of people the advertisers want to talk to.
