## PROGRESS

Recently the Hon. Mr. A. L. Sifton, until lately Premier of Alberta, and now of the Union Government, intimated that measures which will surprise many people are in contemplation by the Union Government. There is something hopeful in a statement of this kind. And in the meantime, we have had a foretaste of the action which the government is capable of taking, in their preparations for Dominion-wide prohibition. This measure, however, is hardly in the nature of a surprise, as in many of the provinces, prohibition has been in force for some time. Proper prohibition, of course, gets at the root of the matter, as this new order in council has done. By stopping the import and manufacture of intoxicating liquor, it is possible to make the prohibition laws much more effective.

The people of the Western provinces would be more than pleased to have some "surprising" legislation carried out, if surprising may be taken to mean "radical." If the Union Government have been able to discern the signs of the times, they will already know that radical changes are necessary for the continued prosperity in the Western provinces. While the effective prosecution of the war is the thing first and foremost which the government has to consider, still there is no need for the Kaiser to defer progress along other lines in Canada.

Among the demands which the West has consistently made and its request has been as consistently turned down by the late government—is the removal of duties upon agricultural implements. The West has for long demanded far-reaching changes in the fiscal and domestic policies of the Dominion. The West has asked for a revision of the tariff, and the increase in the tariff preference on British goods.

If the Union Government comes through with alterations of the present conditions along these lines, there is no doubt that there will be some con-

siderable surprise in different parts of Canada. It might astonish many people, and give some kind of a jolt where a jolt is badly needed. The four Western provinces for the first time in the history of the Dominion have achieved a commanding position in the determination of the nation's policy.

It is safe to say that no longer will Eastern Canada be in a position to dictate to the West regarding protective tariffs. That day is done.

## NOTES AND COMMENTS

"Bring us peace" cried the crowds of German people, as von Kuehlmann left for Brest Litovsk to conduct the negotiations with Russia.

The German people were informed by the cute Foreign Minister that he was going to discuss a general peace. Germany discussing a general peace with the Bolsheviks is something of a joke.

But even Trotsky says Russia will again take up arms if Germany disdains the Russian proposals. And meantime, the Russian delegates have been recalled to Petrograd.

BRITISH AVIATORS  
KILLED IN TEXAS

Fort Worth, Texas, Dec. 27.—Three British aviators in training here were killed when two machines collided in the air. Two of the men were in one machine. The collision took place at a low altitude and less than half a mile from the landing field. The dead are: Arthur Eden Webster, nineteen, Kingston, N. Y.; Lieut. Russell Genner, nineteen, Kingsville, Ontario; and Cyril Albert Baker, twenty, Kent, England.

GERMANS ARE ANXIOUS  
ABOUT THE FUTURE

London, Dec. 27.—German anxiety regarding Germany's economic future is being constantly revealed. During at Bremen, Dr. Karstadt, one of the best known speakers of the German Colonial Society, said:

return from the war they must be provided with bread and work. But how, if raw material is lacking, for example, cotton. The problem is acute owing to the closer economic union of the British Empire."

Dr. Karstadt declared that Turkey could not satisfy Germany's hunger for raw material. Germany must have a central Africa stretching from the Atlantic to the Indian Ocean. Hence, Germany must recover her colonies and enlarge them. She must also construct essential naval bases. Dr. Karstadt concluded by picturing German submarines operating as far as Aden.
