

YOUR CANCELLED CHEQUE IS A RECEIPT

IF you pay each account by cheque on the Bank of Montreal the man who gets it automatically signs a receipt when he endorses the cheque to get his money from the bank. He can not cash your cheque without first signing his name on the back, thus acknowledging payment.

It is because of this method of doing business that payment through your bank is the sure, safe, economical way. You need not even call to pay a bill. Just mail your cheque to the person to be paid.

RAILWAYMEN'S LINGO CERTAINLY PECULIAR

Edmonton Journal Tells of Some of Quaint Phrases Used by Engineers and Others

Nearly every trade nowadays has its vocabulary of slang, and railroading is no exception, says the Edmonton Journal. An article in a travel paper gives some examples of the talk in common use among railroaders, including these:

The railroad engineer is known variously as "eagle eye," "hog-head" and "throttle puller"; the fireman as "diamond pusher" and "tallow pot"; new firemen, "student"; brakeman, "shack," "ground hog," "fielder" and "car catcher"; yardmaster, "switch hog"; yardmaster's office, "knowledge box"; yard clerk, "number grabber"; railroad clerk, "paper weight"; track laborer, "jerry" or "snipe"; a non-union man, "shot tail"; a man who stays in the division about one pay day, "boomer."

The locomotives are "mills" or "kettles"; the heaviest type of engine, "battleship"; lighter type, "hog"; passenger car, "varnished car"; observation Pullman car, "rubberneck car"; box car, "side door Pullman"; coal car, "gon"; steel coal car, "whale belly"; refrigerator car, "reefer"; freight caboose, "doghouse" or "buggy"; pay car, "band wagon" or "family disturber"; a train on which extra fare is charged, "due train"; roof of car, "deck"; riding on roof of car, "decking"; boards running lengthwise of the roof of a car, "running board" or "toepath."

Switching is "shuffling them up"; if three cars are to be cut off you might "amputate three," "saw three," hand me three" or "scuse three." The overheated journal bearing is a "hot box"; and to cool a hot box is to "freeze the hub"; to set the brakes, "anchor them"; to set the emergency brakes, "wing her"; the roadpath on the side of the track is the "grit" and to have to jump is "hitting the grit"; missing a meal is "flying light"; to leave the service, "pull the pin"; to quit for the day is to "pin for home"; to boast is to "blow smoke."

GRAVITY PENDULUM

TOKYO, July 10.—Dr. H. Nagako, professor of physics in the Tokyo Imperial University, is credited with inventing a new pendulum for use in determining gravity. The pendulum is said to be constructed solely of tungsten, mounted in a special way, and to be practically free from outside influences. Its inventor claims the pendulum can withstand heat and magnetic impulses combined.
