

FIRE INSURANCE

Fire insurance is the cheapest commodity on the market today. The rate on your dwelling is from \$1.30 to \$2.00 for each \$100.00 of insurance for 3 years, depending on its location. This means that if you carry insurance on your dwelling for 150 years without a fire you will have paid out only the amount for which you are insured. It is so cheap you can not afford to be without it. We write it.

We've Written Many a CUT GLASS

Ad.

But never in our lives have we felt that we did the subject justice. And we never expect to. Because we have no command of words that will describe the beauties of our cut glass. We can tell you that it radiates light of endless colors, of its weight, and that there is no higher grade of cut glass made, etc., and yet we feel that we haven't said much about it.

To make it easier will you just make a visit here?

before purchasing a baking powder that may possibly contain injurious ingredients. Many food scientists claim that baking powder containing alum is unsafe for use in food. The mere fact that some brands of baking powder have the words "No Alum" on the label is not sufficient proof that they are what they are represented to be. Our chemists find a good many have "No Alum" on the outside, but large quantities of it inside.
