# DEVELOPMENT DEPENDS UPON THE PEOPLE

Keynote of Success Lies in Co-operation, Says Member for District.

## GOVERNMENT CAN ONLY LEAD AND DIRECT

Hon. T. D. Pattullo was seen yesterday by a Daily News representative and asked if he had anything to say in regard to the development of this central part of British Columbia. He said: "The development that has taken place in Northern British Columbia is very gratifying. I have recently covered the greater portion of the province and while in all parts development is very marked, in no part is it more remarkable than in Northern British Columbia.

"Everyone recognizes that we have wonderful resources in the province, but it is quite evident that these resources are of no value unless they are developed. The only way to develop them is to get people into the country.

## Make Conditions Right.

"It is not sufficient, however, to get people into the country. We must try to make conditions so favorable that those who come may be readily assimilated. The real development of the country after all, depends upon the people. What the government can chiefly do is to lead and direct. In this, I venture to think, the government is doing capable and efficient work. In respect to the opening up of our lands, the extension of markets for lumber; the encouragement of the pulp industry; the development of our water powers; the protection of irrigable lands; the increase in stock breeding and the encouragement of mining development, all of these are being handled by the government comprehensively and very splendid progress is being made.

"This year Northern British Columbia has received more attention than ever before, and I think the people of the south of the province realize, as they never did before, the possibilities of this part of the province.

"We must all keep up the good work, for the keynote of success lies in co-operation."

## EMPLOYERS

## THE EMPLOYMENT SERVICE OF CANADA

The PROFESSIONAL and BUSINESS SECTION has been established to assist professional, business and technical men and women.

Many officers, soldiers, sailors and war workers, who sacrificed their positions during the war, now desire to secure employment in the occupations for which they have been specially trained.

Employers should not wait until increasing business forces them to employ anybody they can obtain, but should look ahead and avail themselves of this unusual opportunity to enlist the services of highly trained workers, ordinarily secured only with difficulty. On application there can be referred to you, for example:—

ENGINEERS  
ARCHITECTS
