TEACHER CAME FROM VICTORIA IN BOAT

Delayed by Running on Rock Near Prince Rupert Harbor After Long Trip.

On Tuesday there arrived in the city C. W. A. Drader who is on his way to the Queen Charlotte Islands to take charge of the public school at Port Clements. He made the trip here in a 22-ft. launch with a cabin top. The launch travels at a rate of eight miles an hour with a Pierce two-cycle motor.

Mr. Drader left Oak Bay, Victoria, in his small but staunch craft on the 3rd of this month and intended to reach Prince Rupert on Monday the 15th, as the Victoria office had told him that there was a boat for the Islands yesterday. Everything was going along fine until he struck a rock just outside of the harbor here and was held up for some time. This delayed his arrival.

No difficulty was experienced in getting over the sounds, but when crossing Queen Charlotte it was through a dense fog and a compass course had to be taken. There was the customary heaving, veering and chop. The roughest part of the trip was experienced in coming to Wright's Sound where quite a squall blew up owing to conflicting mountain breezes.

Mr. Drader who is a British Columbia man joined up with the Canadian forces at Edmonton in the 49th infantry and he had two brothers with this unit. They all went overseas together but were very soon separated at the front. On his return to Canada after several months' convalescence he came to British Columbia and has accepted this position as teacher at Port Clements. Mr. Drader will remain in town until next week awaiting boat connections.

We sell Frisbie Engines Complete and ready to install.

Frisbie Motors give long, uninterrupted service with practically no repairs except occasional grinding of valves. Valves in cages; accessible in a few seconds. An "all muscle" construction throughout, every part designed for hard work. Overhead valves, opening directly into combustion chambers. No pockets or crevices to gather carbon, and waste fuel. This type of construction effects a gain of

15 to 20 per cent. more power

than is possible with L or T-Head designs. Intake and exhaust manifolds are cast integral with the cylinder; miles ahead of the old, leaky, bolted-on manifolds. Large valves insure full charge on the intake and a complete, clean exhaust.

1 to 6 CYLINDERS—5 to 75 HORSEPOWER

Frisbie Motors are made in following sizes: 1-cyl., 5 and 7 H.P.; 2-cyl., 10 and 16 H.P.; 3 cyl., 18 and 25 H.P.; 4-cyl., 30 and 40 H.P.; 6-cyl., 50 and 75 H.P.—Bore and Stroke, 4 1/4" x 5" and 6" x 6". For work or play, the Frisbie will measure up to your hardest tests.
