A Brief Synopsis of Liberal Policy

EREWITH is a brief synopsis of policy as laid down by the Liberal Party of British Columbia, in convention held in October, 1932.

Many matters of interest, not specifically set out, will require consideration. The principles enunciated are indicative of the Liberal viewpoint, and are broad enough to meet every question within provincial jurisdiction.

The Liberal Party exists as an official organization for the purpose of formulating and furthering measures that will make for the wellbeing of each individual member of society, and the welfare of society as a whole.

Innumerable questions, both of public and personal character, can be properly treated only through the agency of government.

Government is not an ordinary business, but carries responsibility to meet every problem arising from our complex social and economic conditions, in order that not merely a few, but all of our people may live in reasonable comfort.

The Liberal Party pledges immediate action under the best available advice and closest study.

T. D. PATTULLO.

August, 1933.

1.—Profitable and permanent Employment is the most important question facing our people. There should be co-operation between the national, provincial and municipal authorities and the Canadian banking system to establish the necessary credit to carry out a broad programme of constructive and useful wage-distributing public enterprise, and to further the health, education and well-being of all our people.

An Economic Council should be established, the membership of which shall consist of representatives of the various avenues of endeavour, such as health, education, agriculture, labour and the industries. This council will be appointed by the government on recommendation of the interests involved, and will act in an advisory capacity to the government.

Amongst other things the council will study industrial and social effort in the province and suggest means to correlate these efforts. It will familiarize itself with intra, inter-provincial and foreign trade, and will co-operate with the other provinces and the Dominion. It will also study such questions as production and consumption, and the marketing of our products, the number of hours of work per day and days of work per week, the standard of wages and commodity prices. These questions are of national as well as provincial concern, and British Columbia can take the lead in urging co-operation with the other provinces and the Dominion as a whole.

National Unemployment Insurance should be established upon a contributory basis.

2.—Our Financial position must be reviewed. Current expenditure must be kept within current revenue. While maintaining the credit of the province, effort must be made to reduce capital charges. We cannot continue to pay exorbitant rates of interest for money.

3.—The Taxation Structure must be revised with a view to reduction wherever possible, including exemption in the lower scale of wages and salaries.

4.—The health of each of us is important to the whole community, and a measure of State Health Insurance should be made effective, not only to preserve health, but to reduce costs both to the average citizen and to industry.

5.—A general and effective review must be made of the Educational problem, rejecting any proposed organization that involves a caste system. We must facilitate the intellectual growth of each individual member of society in order to equip him for his daily tasks, and for the enjoyment of such cultural pursuits as may be in keeping with our social customs.

Triangular disagreements between the school boards, municipal councils and the department of education must be adjusted, and our whole system placed upon a sound financial basis.

6.—The financial position of our Municipalities is of increasing concern. An equitable adjustment must be made as between the province and the municipalities, and the municipalities placed in a sound financial position.

7.-An effort should be made to settle our Agricultural Lands in order that more of our citizens may be self-supporting. Agriculture as a whole must be put upon a sound and profitable basis, and made capable of sustaining and directing itself, in line with all other national, basic industries.

3.-Continuous effort should be put forth to assist industry in Marketing its products, in timber, agriculture, fishing, mining and, in fact, every operation where it appears that useful service can be rendered.

9.—Our highways must be kept in good condition, both for the benefit of settlers and the tourist traffic, and expanded as circumstances warrant. In this connection a Highway Board should be established to make for continuity of policy and to inspire confidence in impartial treatment.

10 .- A Public Utilities Commission should be established.

11 .- A National Central Bank should be established.

12.—Social Services, such as Mothers' Pensions, Old Age Pensions, etc., must be maintained. Abuses of administration should not be allowed. and injustice through mere technicalities should not be permitted.

13.—The Peace River must be given access to

the Coast. 14.-In order that the utmost Freedom of Action by Members of the Legislature may be assured in respect of questions before the House, it is Liberal policy that a government shall be considered to be defeated only upon a straight

want-of-confidence motion. 15 .- The Dominion Government will be asked to place the Province of British Columbia upon a basis of equality with the other provinces, and to this end request will be made for a Royal Commission to ascertain the extent to which the Province of British Columbia has not been given Equality of Treatment with the Other Provinces of the Dominion.

16.—There shall be a permanent Voters' List to

ensure that all eligible voters are enrolled. 17.—The Leader of the Liberal Party is given a free mandate to choose for his associates in government, men of character, ability and standing, having regard solely to the public interest.
