Railway Freight Rates Bill Passes Commons and Goes to Senate

Gives Railway Commissioners free hand in revising rates except eastbound on flour and grain

OTTAWA, June 19.—A bill amending the Railway Act so as to clear the way for equalization of freight rates throughout the dominion by the Board of Railway Commissioners, passed the House of Commons last night.

No division was taken on the third reading. Two amendments both from the Progressive Party while the bill was in committee stage, met defeat.

The bill now goes to the Senate.

The bill gives the right to the Board of Railway Com-

missioners to revise the rates in any respect except that the rates on flour and grain from the prairies to Fort William must not be increased beyond those set by the Grows Nest Pass agreement, made years ago with the C.P.R. This exemption was insisted upon by the Progressives, who are mostly representatives of prairie constituencies.

A clause in the instructions to the Board of Railway Commissioners conveyed through an order in council tells them to make the rates westward such as to encourage grain shipments through Pacific ports. If this is carried out the rates from Alberta to the coast must be lower than to Fort William.
