

Fort George

THE NEW FORT GEORGE, Moderate will be in power again, and it is simply means that the future of FORT GEORGE is assured. The Vancouver-Fort George railway is going to be built in three years, if not earlier, others will follow before long. It is really time to hurry up if you want to get out of something there. Don't talk about waiting for the F. G. P. The building of the FORT GEORGE RAILWAY has settled that question, the proper location for the FORT GEORGE is at the foot of the Indian Reservation and GLEN TOWN, and as you know a town grows naturally westward. Fort George could not grow east, however, for there is the Fraser River. LOTS as well as FORT LAUREL are selling very fast now, and after APRIL 1912, 1912, PRICES in the residential section will be advanced \$1000 per lot. The G. F. P. will be at Fort George by this FALL. Get in now before these prices advance. We have some good business property for sale. Don't delay before we raise the price. Fort George today is like some other place three years ago. If you have missed the opportunity then, you have missed it. It won't come again. Drop in to see me. It won't come again, and you may learn some interesting facts.

PRINCE RUPERT.

Two lots, block 2, section 1, \$20,000; 1-2 cash, balance 10 and 12 months.

WONDERFUL POWER OF RADIUM DESCRIBED BY ABLE EXPERT

OBSERVATIONS BY LEADING ELECTRIC-THERAPEUTIC PHYSICIAN ON COMMENT THAT MME. CURIE'S ILLNESS HAS BEEN CAUSED BY RADIUM.

New York, April 2.—Reports from Paris that the illness of Madame Curie, the French scientist, is due to continued exposure to radium were received with interest by the radium experts of this city.

Dr. William James Morton, professor of electro-therapeutics and diseases of the mind and nervous system at the Post-Graduate Medical School and Hospital, and one of the first in this country to take up radium in investigating a cure of cancer, was willing to believe that the reports are true.

"It is entirely possible, and even probable," said Dr. Morton, "that Madame Curie would break down from literally living in an atmosphere of radium. If a large quantity, say a spoonful, could be gathered together, I wouldn't consent to sleep within a hundred yards of it, nor would I handle it very much."

Greatest Force Known.
"The force of radium is the most tremendous thing known to science," he continued, "and if improperly used of course would have a bad effect."

"The force of radium is not generally understood. Radium is more powerful than dynamite. When you realize that a ray will pass through a flatiron with no diminution in its speed you will begin to realize what force scientists are handling. Light travels at the rate of 186,000 miles a second. Radium rays travel just as fast."

"A short time ago I suspended an aluminum tube eight inches

above a heavy army revolver and took a picture of the revolver. The rays of the radium lighted through the revolver and the cartridges in the revolver came out in the picture as clearly as if they had not been enclosed in the heavy steel chambers. I have taken pictures through lead through radium. You can see how powerful radium is."

Value of Radium.
The doctor produced two tubes of radium which he uses. Each tube is worth \$1,000, and each contains ten milligrams of radium.

The tubes are about two inches long and about the thickness of a tattooing needle. In one end of them rests the bits of radium, so small that they could be balanced on the head of a pin.

"There is not quite a teaspoonful of radium in the world," continued the doctor. "If that were gathered together in one room any one man who would stay with it for a few hours would be dead. If I fastened one of these tiny tubes to the back of your head and let it remain there for a period of, say, two weeks you would be dead. But that doesn't mean at all that radium is dangerous if properly used."

"Radium properly used is a most valuable aid to surgery, particularly in the cure of superficial cancer and tumors. Some cancers it won't cure, but many it will. Improperly used, of course, radium, just like strychnine or nitroglycerin, will harm."

Candidate for Third Term Earned Million and Quarter in Fifteen Years from Political Jobs and as Literary Free Lance.

New York, April 2.—As holder of political offices, literary free lance, peace prize, not counting back book royalties and salary of "contributing editor," Theodore Roosevelt has made in fifteen years almost \$1,250,000.

Roosevelt's "African Game Trails," from the day he left America till he had accomplished his shooting trip and set foot in Europe, occupied eleven months and ten days. Up to date his receipts for writing his hunts have yielded about \$634,000.

His earnings are summed up as follows:

Assistant secretary of navy, two years.... \$16,000
Governor of New York, two years..... 20,000
Vice president of United States, one year.... 8,000
President of United States, seven years... 350,000
"Awarded Nobel Peace Prize..... 40,000
From Scribner's Magazine..... 35,000
Royalty on "African Game Trails"..... 634,000
Lectures, three years..... 9,000

Fifteen years' earnings, total..... \$1,112,000
To which should be added salary on "Outlook" and magazine articles and book royalties on books, unknown, but probably making the total..... \$1,250,000
"Gave it to promotion of industrial peace."

Why He Buys at Home.
A retailer in the United States gives the following reasons why he buys in his home town:

Because my interests are here.
Because the community that is good enough for me to live in is good enough for me to buy in.

Because I believe in transacting business with my friends.
Because I want to see the goods.

Because I want to get what I pay for.
Because every dollar I spend at home stays at home and helps work for the welfare of the city.

Because the man I buy from stands back of the goods.
Because I sell what I produce here at home.

Because the man I buy from pays his part of the city and county taxes.
Because the man I buy from helps support my school, my church, my lodge and my home.

Here is where I live and here I buy.

—Walt Mason.

BEWARE OF THE BIG DOG

A St. Bernard May Possibly Be a Blind Pig in Disguise—Used in Maine, so Why Not in Skeena?

The St. Bernard is the noblest of all dogs. He is not only huge and handsome with an irrepressible character, but is much more. He is a whole life saving station in himself.

The St. Bernard was originally designed by the monks of Switzerland long before railroads and interurbans were invented. The monastery was located at the top of a mountain pass where it began to snow in July and quit the last of June. Transportation facilities were only sketchy and often the traveler in attempting to wade over the pass got buried in snow to his neck or farther, and was dug out in a beautiful state of preservation the next spring.

To prevent these delays the monks trained the St. Bernard dog to roam the mountainside after each heavy snow storm and prospect for travelers. Armed with a small barrel of stimulants slung from his neck the faithful animal, guided by his uncanny nose, poked out the traveler and pointing to the barrel as best he could said with his tail: "Have one on me." Then he escorted the cheerful victim to the monastery and filed his application for another Carnegie medal.

In consequence of this beautiful custom, travel over the pass became so enormous that the monks were compelled to decline to rescue any traveler more than once a day. Vast numbers of dogs were kept constantly employed, while the breeding of these animals for use in Maine, Kansas and other regions, where it is necessary to be snowed in on a mountain pass to prevent death from thirst, became a very profitable side line. The world is now full of St. Bernard dogs, but owing to the perfection of interurbans and the ordinary red light drug store, they are not used as much as formerly for life saving purposes.

The St. Bernard has long, thick hair and a face which fits well in almost any painting. He is easily domesticated, and can be taught many clever tricks, such as pushing over the piano or standing on his hind legs and locking the clock's face. A small barn makes a very nice kennel for a medium sized specimen. Some people keep a St. Bernard and others keep an automobile, while captains of industry and owners of corner lots on Fifth avenue, New York, are able to support both.

"We" Stayed Our Hand.
(Prince Rupert Empire)

If we desired to hit back at those who are criticizing our course we could make some of them look like two cents.—(As quoted in the Vancouver Sun).

Our Tripping Authors.
According to an author, the hero "brushed her hair with his lips." Scarcely an improvement on the old method, we think.

"He rested his feet on the back of a chair and blew smoke rings with half closed eyes." We've seen it done with the mouth.

"Marjorie would often take her eyes from the deck and cast them far out to sea." As a matter, old Ike Walton had nothing on Marjorie, believe us.

"Speechless with horror and loathing, I tottered a helpless jelly against the jamb." We believe that the mess was cleaned up in the next chapter.—Boston Transcript.

The place honors not the man who gives honor to the place.

"Pippa Passes."
I met her on the street—
She smiled and spoke;
My goodness! She looked sweet,
And that's no joke!

Met her again one day,
She spoke—and blushed;
Stranger, you know—but, say—
Well, I was crushed!

Yesterday—it was she,
Be still, my heart!
'Twas in a beauty;
I had a start.

She was a waitress—meek
With a downcast eye.
And—well, she didn't speak
As she passed the pie.

A Lunogram.
At midnight in his guarded tent
The Turk awoke and frowned a frown,
And to the Italians this message sent:
"You gotta quit kickin' my dawg aroun'!"
—Springfield Union.

Birk's Beautiful Cut Glass and Pierced Silverware

Is brought within reach of every buyer in BRITISH COLUMBIA by our thorough, far-reaching mail order service. We can supply wedding presents from these lines to any customer in the Province promptly and at moderate prices. All goods will be prepared to your nearest railway express office and money will be returned when goods are not entirely satisfactory. Our illustrated catalogue is the great medium between our store and the buyer. Write for it; it will be mailed free to your address.
